■ OVERVIEW

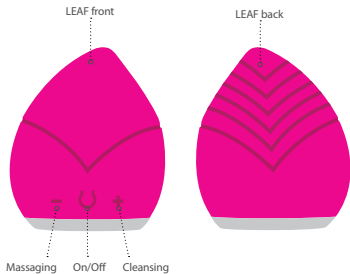

PopSonic's new skincare system will invigorate your beauty regimen, leaving your skin looking smoother, cleaner, and younger.

With its Leaf-like shape, the LEAF is specifically designed with the contours of your face in mind.

Use the LEAF as part of your daily cleansing routine. The LEAF's soft silicone bristles coupled with sonic vibrations provide a much deeper clean than washing by hand. When used in conjunction with your usual skin care products, the LEAF will help to infuse your product into the dermal layers past the skin's surface. With 7 "plus" speeds and 7 "minus" speeds, finding the most effective and comfortable setting for your various skin regimens is achievable.

Regular use of the LEAF will lay a foundation of lifelong younger, healthier looking skin.

■ Fig. 01

■ WHAT'S IN IT

1) LEAF

2) CHARGING CORD

*NOTE: USB adapter not included

3) MANUAL

■ USING THE LEAF

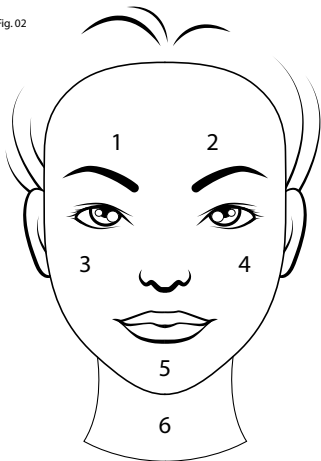

- 1) Press center button to turn on. When activated, the LEAF will be on the middle speed – speed 8.
- 2) Press the center button again and LEAF will turn off.

To the left of the ON/OFF button is the MASSAGING “-” button. If you press this button once, you will go from speed 8 to speed 7, which is a slightly slower vibration. If you press the button again, you will proceed to speed 6, which is a slower vibration still. Press the button again to go to speed 5, and so on down to speed 1. To progress back up in speeds, press the plus “+” button until you reach the speed you want.

To the right of the ON/OFF button is the CLEANSING “+” button. If you press this button once, you will go from speed 8 to speed 9, which is a slightly faster vibration. If you press the button again, you will proceed to speed 10, which is a faster vibration than 8. Press the button again to go to speed 11, and so on up to speed 15. To progress back down in speeds, press the minus “-” button until you reach the speed you want.

At any time you can press the ON/OFF button to turn the LEAF off. Then press the ON/OFF button again to start again in MEDIUM mode (speed 8).

■ Fig. 02

■ CLEANSING MODE

Using the front of the LEAF, the CLEANSING modes delivers sonic vibrations thru thousands of soft and rounded silicone bristles to help remove dirt, oil, and makeup residue from your pores. The LEAF is programmed to briefly pause every 20 seconds to remind you to move from one area of your face to another. After 2 minutes the LEAF will shut off automatically.

- 1) Remove all makeup, then dampen your face and apply your regular cleansing product.
- 2) Turn on your LEAF and start cleansing around your forehead and brow areas (zones 1 and 2), then work your way down to your eyes, cheek, and nose (zones 3 and 4), then chin (zone 5) and neck (zone 6).

In each area, seen in Fig. 01, find the speed that is most comfortable. Around the eyes it may be a lower or middle speed while around the forehead and neck a higher speed may be most effective.

■ MASSAGING MODE

The thicker silicone bristles on the backside of the LEAF are effective in diminishing the appearance of fine lines and wrinkles. Use this mode at any time with or without product for more youthful, healthy looking skin. Using anti-aging skin cream or serum is recommended but not required.

- 1) Press the ON/OFF button to start the LEAF. Using the backside of the LEAF, start massaging the areas of your face or neck that you would like to firm up then find the speed that feels most comfortable for you.
- 2) Massage that area for 20 seconds until the LEAF indicates it is time to move to another area by pausing briefly. The LEAF will cycle thru 6 segments before turning off after 2 minutes. If you have not finished, simply turn the LEAF on by pressing the ON/OFF button once and finish your regimen. Turn off the LEAF by pressing the ON/OFF button again.

■ CHARGING

A fully charged LEAF will hold a charge for many weeks when used as directed, up to 400 uses. When you start to feel the power of the vibrations becoming weaker, it is time to charge your LEAF. The LEAF comes with a USB cord for easy recharging. Simply plug the USB cord into your computer or other USB port and the LEAF charging indicator light will begin blinking. Once the light is constant, this indicates your LEAF is fully charged and you should remove the charging cord from the LEAF. Charging a LEAF will normally take about 20-30 minutes.

■ Fig. 02

■ FEATURES

- 15 adjustable speeds
- 2 minute timer with 20 interval indicator
- Up to 12,000 vibrations per minute
- Built in rechargeable lithium ion battery
- Waterproof (IPX5)
- Food grade silicone rubber exterior
- Up to 400 uses per charge

■ CLEANING & STORING YOUR LEAF

The better you take care of your LEAF, the longer life span it will have.

Thoroughly clean the LEAF after every use by washing the surface with soap and water. Pat dry with a lint free cloth.

Never use products containing alcohol, petrol, or acetone to clean your LEAF.

Avoid using clay based, silicone based, or grainy cleaners, exfoliators or scrubs as they may damage the LEAF's soft silicone bristles.

■ THINGS TO KNOW

Avoid sharing the LEAF with others to prevent unhygienic occurrences.

Using the LEAF should be comfortable. If you experience any discomfort, discontinue use immediately and consult your doctor or dermatologist.

If you have a skin condition, consult your dermatologist before use.

Use particular care around your eyes and avoid coming in contact with your eyelids and eyes themselves.

Do not allow children under 12 to use the LEAF without adult supervision.

Do not use the LEAF or any charging devices if they are damaged.

When charging, make sure the LEAF and the charging cord are dry and that while charging, the LEAF is not near water. Coming in to contact with water while charging could cause irreparable damage to the LEAF.

■ COMMON QUESTIONS

*Why doesn't the LED light come on when I plug in the charger?

- The battery may already be fully charged
- The battery may be drained and will require a few minutes before it starts charging
- Check the charging cable and USB port to make sure they are functioning properly

*Why doesn't the LEAF turn on when I press the ON/OFF button?

- Battery is depleted, recharge your LEAF

*The surface of the LEAF is eroding or degrading, why is this happening?

- Most likely the LEAF has come in to contact with a substance that damages silicone. Please consult the CLEANING and STORING YOUR LEAF section of this manual for how to prevent this from happening.

*How can I get in touch with someone about my PopSonic LEAF?

- Call our customer service center at (631)619-7122. If you do not reach a representative, leave a message and we will call you back promptly.
- Email us directly at JEFF@SHOPPOPSONIC.com

■ LEAF 2 YEAR LIMITED WARRANTY

POP SONIC warrants the LEAF for a period of 2 years after the original date of purchase, against defects due to faulty workmanship or materials. If you notify POP SONIC of a defect with your device within this 2 year period, POP SONIC will, at its discretion, replace the device free of charge.

This warranty covers working parts. It does not cover damage due to normal usage or accidents such as dropping the device. Other exclusions include misuse or neglect to the device.

This warranty is void if any other charging cables besides the one you received is used with your device.

For any warranty claims, proof of purchase must be provided. For this reason, please keep your receipt for the duration of the warranty period.

For warranty claims, you must register your device and log in to your account at www.shoppopsonic.com, then select the option to make a warranty claim. Our customer service department will then contact you to initiate the warranty procedure.

Shipping costs are non-refundable.

■ DISPOSAL INFORMATION

The crossed out trash bin on the bottom of the LEAF indicates that this device should not be treated as normal household waste but should be brought to the appropriate collection point for recycling of electronic equipment.

For more information on how to recycle or dispose of this item, please contact your state or local waste disposal service.
